

ErgoSupport[®]

Anti-Fatigue Mat

AORN Recommendation

If a caregiver is standing in the same position for more than two hours continuously or more than 30% of the work day then they should use fatigue reducing-techniques (i.e. alternate propping one foot on footstool, anti-fatigue mats, sit-stand stool, supportive footwear).

2012 AORN Perioperative Standards and Recommended Practices pg. 698.

Intended Use

Intended to act as an ergonomic product that reduces fatigue of nurses and surgeons experienced from long hours of standing in one location.

Key Features

- Uses a dual foam and gel technology to provide comfort under foot
- Top surface provides necessary friction level with damp or dry surgical booties
- Bottom surface is made of a high-traction material to provide slip resistance
- Sides are beveled to prevent tripping
- Bright red color for easy visibility
- Compatible with hospital grade quaternary cleaners
- Available in small, medium, and large sizes
- Small size fits on operating room step stool
- Water-resistance
- Reusable for 6-12 months
- Non-sterile and not made with natural rubber latex
