

Transparent Dressing

Intended Use

Intended for woundcare applications, securing objects to the skin such as catheters, and as a secondary dressing.

Key Features

- Securely holds the catheters and other devices in place while gentle on the skin
- Used to protect wound site from bacterial and viral infection
- Breathable to ensure proper moisture content in the wound bed
- Clear dressing allows for wound visualization
- Offered in two popular sizes
- Flexible and forms to body contours to provide less stress to the patient's skin during movement
- Can be worn longer than tape and gauze dressings leading to less dressing changes
- Hypoallergenic
- Available sterile or non-sterile for kit applications
- Sterile, intended for single-use, and not made with natural rubber latex
