

ErgoSupport[®] Anti-fatigue Step Stool Mat & Step Stool

Intended Use

Intended to act as an ergonomic product that reduces fatigue of nurses and surgeons experienced from long hours of standing in one location.

Key Features – Step Stool Mat

- Helps to help reduce fatigue that healthcare personnel experience during long hours of standing in one location
- Uses ¾" energy-return polyurethane foam to provide comfort under the foot
- Matte textured surface provides optimal friction to help prevent slips and falls
- Features a low-profile, durable edges, and slip-resistant bottom
- Sides are beveled to prevent tripping

- Small size fits on operating room step stool
- Fluid and dirt resistant with anti-microbial properties
- Non-sterile and not made with natural rubber latex

Key Features – Step Stool

- Stackable & interlocking cast aluminum step stool
- Protected with an anti-microbial coating
- Designed to eliminate sites for liquid pooling and debris accumulation to help reduce contamination
- High density rubber foot pegs
- Compatible with the ErgoSupport[®] Anti-Fatigue Step Stool Mat
- Anti-slip surface for better stability
- Non-sterile and not made with natural rubber latex

ErgoSupport®

Anti-Fatigue Step Stool Mat & Step Stool

Reducing fatigue of nurses and surgeons during procedures.

Part No.	Description	Color	Size	Per/Case
85005	Step Stool Mat	Black	13" x 17"	5
ST-001	Step Stool	Black	13" x 17"	4

AORN Recommendation

If a caregiver is standing in the same position for more than two hours continuously or more than 30% of the work day, then they should use fatigue reducing-techniques (i.e., alternate propping one foot on footstool, anti-fatigue mats, sit-stand stool, supportive footwear).

2012 AORN Perioperative Standards and Recommended Practices pg. 698.
